

Overview

Vortex Metals (TSXV: VMS) (FSE: DM8) (OTCQB: VMSSF) is a resource exploration and development company with copper assets in Chile and Mexico. Co-founded by the late David Jones (geologist responsible for the discovery of Los Filos) and experienced mining explorers and financiers, Vikas Ranjan and Michael Williams, the company is looking to capitalize on what it perceives will be a future copper supply-demand imbalance. On the back of a dearth of new discoveries over the past decade, which has led the International Energy Agency (IEA) to forecast a copper deficit as early as 2026, VMS aims to uncover and develop high potential copper deposits in Chile's Choapa province and Mexico's VMS belt in the state of Oaxaca.
